PROFESSIONAL SUMMARY

Computer Science undergraduate at VIT Chennai focused on artificial intelligence, reinforcement learning, and systems programming. Passionate about developer tooling, intelligent agents, and high-performance software systems. Currently serving as AI/ML Co-Lead at the Microsoft Innovations Club.

EDUCATION

Vellore Institute of Technology (VIT)

B.Tech in Computer Science Engineering

- AISSCE (CBSE) – 90%
- AISSE (CBSE) – 94%

Chennai, India

2025 – 2029

2024–25

2022–23

TECHNICAL SKILLS

Languages: Python, C++, C, JavaScript, HTML/CSS, C#

AI/ML: PyTorch, Stable-Baselines3, NumPy, PPO, SAC, ResNet50

Tools: Linux (Arch), Git, Neovim, VS Code, Pygame

Core Areas: Reinforcement Learning, Systems Programming, OOP, DSA, Performance Optimization

LEADERSHIP & EXPERIENCE

Microsoft Innovations Club (MIC)

AI/ML Co-Lead

- Orchestrate AI/ML-focused workshops and technical initiatives for the student community.
- Mentor students in modern development workflows, AI tooling, and project-building best practices.
- Direct technical planning and automate tasks to streamline event execution and community engagement.

VIT Chennai

2026 – Present

AI/ML Member

2025 – 2026

- Contributed to collaborative technical projects and participated in advanced AI learning sessions.

Linux User Group (LUG)

Technical Member

VIT Chennai

2025 – 2026

- Advocated for open-source ecosystems and optimized terminal-based developer productivity workflows.

Hack Club

AI/ML Member

VIT Chennai

2025 – Present

- Engaged in student-led development initiatives and collaborative coding activities.

PROJECTS

Autonomous Warehouse Rover | Python, PyTorch, Stable-Baselines3

- Engineered a reinforcement learning agent utilizing Proximal Policy Optimization (PPO) for autonomous navigation.
- Implemented curriculum learning strategies to train the agent on increasingly complex warehouse layouts.
- Developed a custom environment simulation and rendering system using MVC architecture from the ground up.

MusicalTerm | Python

- Developed an aesthetic terminal-based music player tailored for command-line focused workflows.

Campus Signal Mapper | HTML, JavaScript

- Built a crowd-sourced visualization tool to map mobile carrier performance across the VIT Chennai campus.
- Developed an interactive frontend for real-time signal data collection and dynamic heatmap generation.

Celeb Classifier | Python, ResNet50, Deep Learning

- Architected an AI-powered web application using ResNet50 for high-accuracy facial similarity matching.
- Open-sourced the project under GNU GPL v3 to encourage community contributions and transparency.

Snake - AI Edition | Python, Pygame

- Reconstructed the classic Snake game featuring an automated bot driven by Greedy and A* search algorithms.
- Improved pathfinding efficiency for real-time decision-making in dynamic environments using Greedy and A* algorithms.

INTERESTS

Linux Customization, Terminal Ricing, Experimental Coding Projects, Coffee Culture, Music, Story-Driven Games, Online Tech Communities
